# *Association for the Study of Dreams*

## *Purposes*

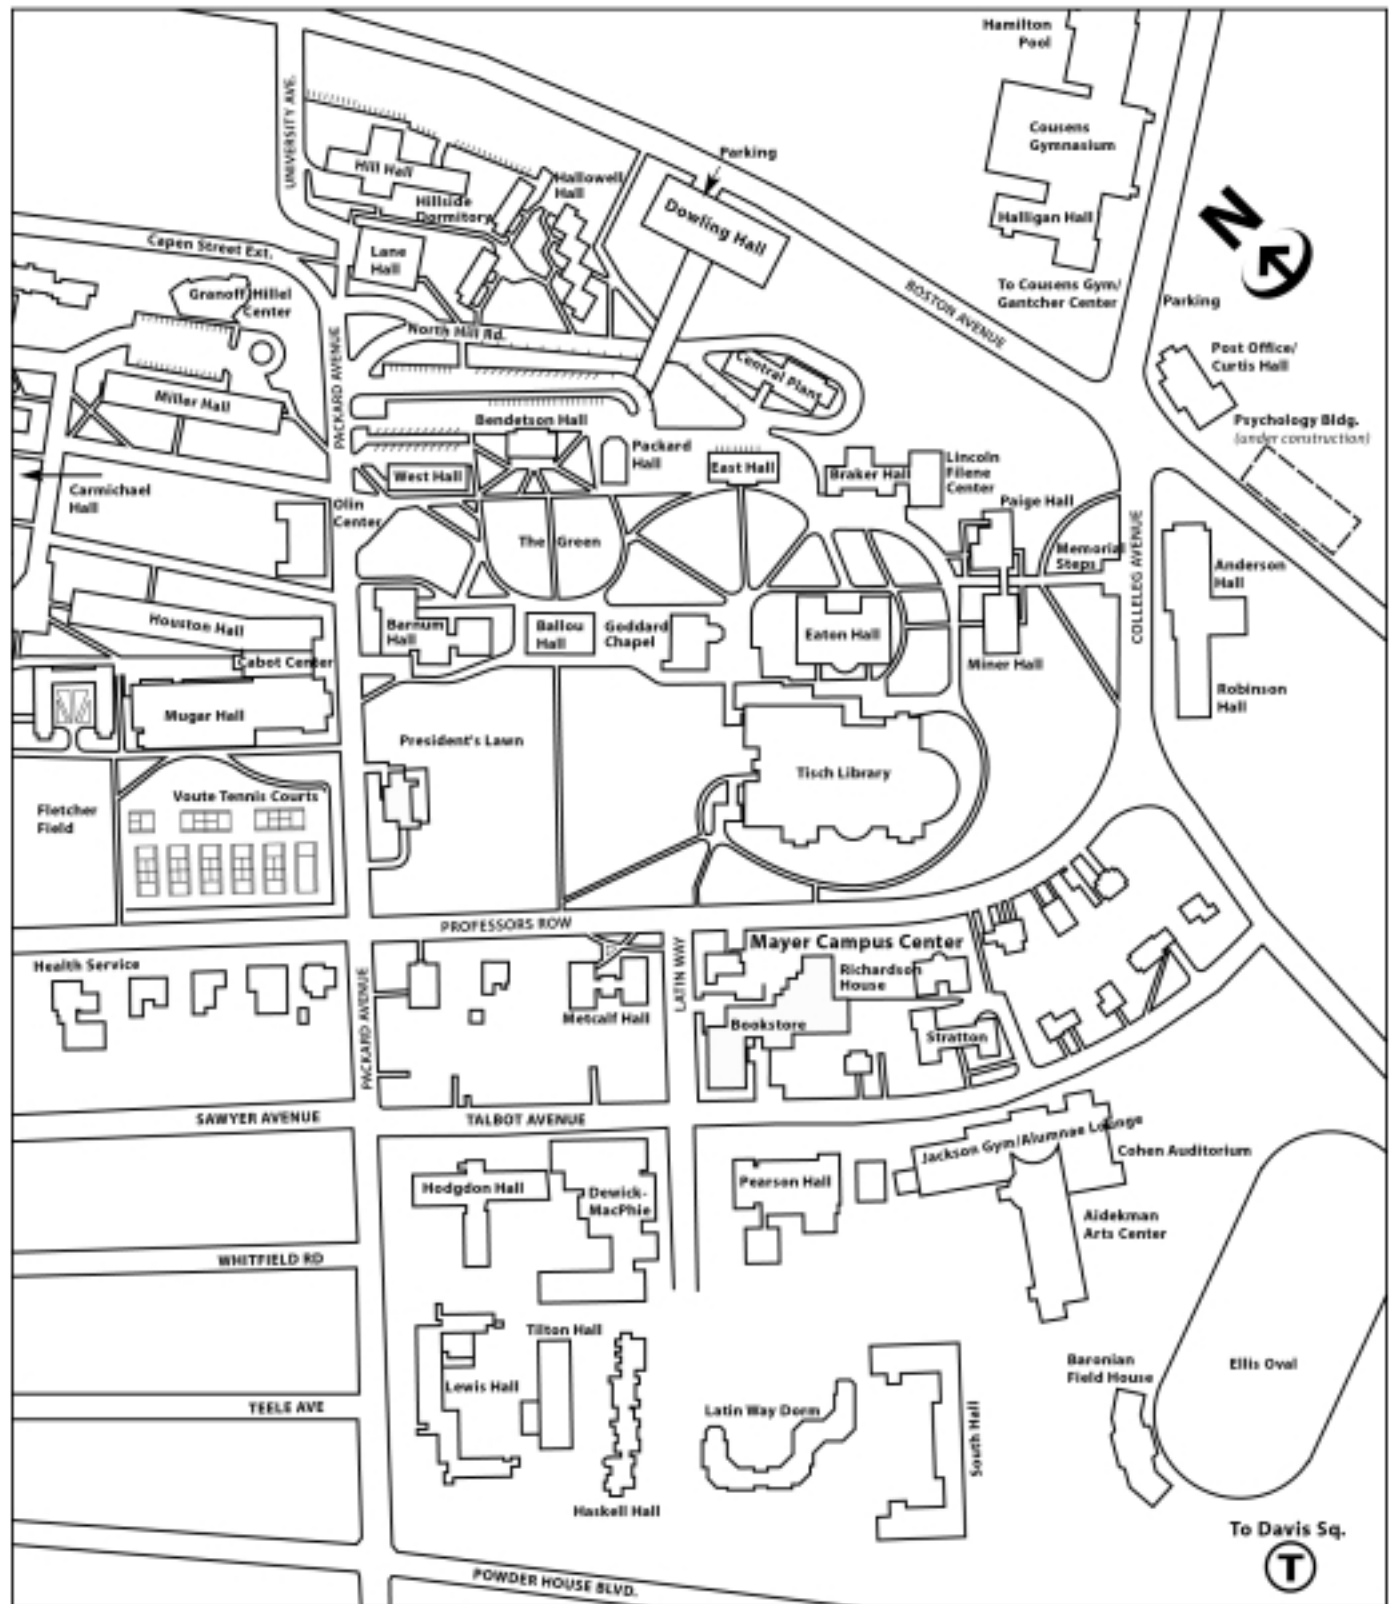

The Association for the Study of Dreams is an international multidisciplinary organization dedicated to the pure and applied investigation of dreams and dreaming. Its purposes are to promote an awareness and appreciation of dreams in both professional and public arenas; to encourage research into the nature, function, and significance of dreaming; to advance the application of the study of dreams; and to provide a forum for the eclectic and interdisciplinary exchange of ideas and information.

## *Abbreviated Ethical Statement*

The Association for the Study of Dreams acknowledges the value and importance of the study of dreams and recognizes the responsibility inherent in such study and its consequent applications. The Association encourages its members to exemplify the highest standards of ethical behavior in whatever involvement they may have with dreams. Members are thus encouraged to do their utmost to respect the rights and dignity of other persons; to be honest, accurate and open-minded in the presentation of information and ideas; to ensure privacy and confidentiality in dealing with clients, research subjects or members of the general public; and to prevent and avoid any situation where a conflict of interest may compromise the capacity for making prudent and objective decisions and responses.

In keeping with these broad principles, the Association considers it unethical, at its own conferences and programs, for members to use direct solicitation or persuasion for economic or self-aggrandizement. Presenters are expected to be honest and accurate in the communication of their own credentials and competencies.
